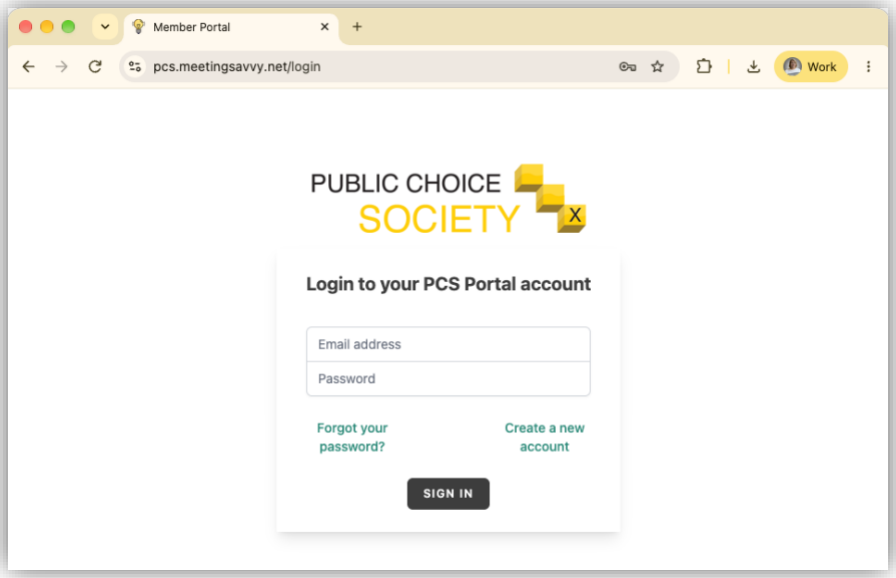
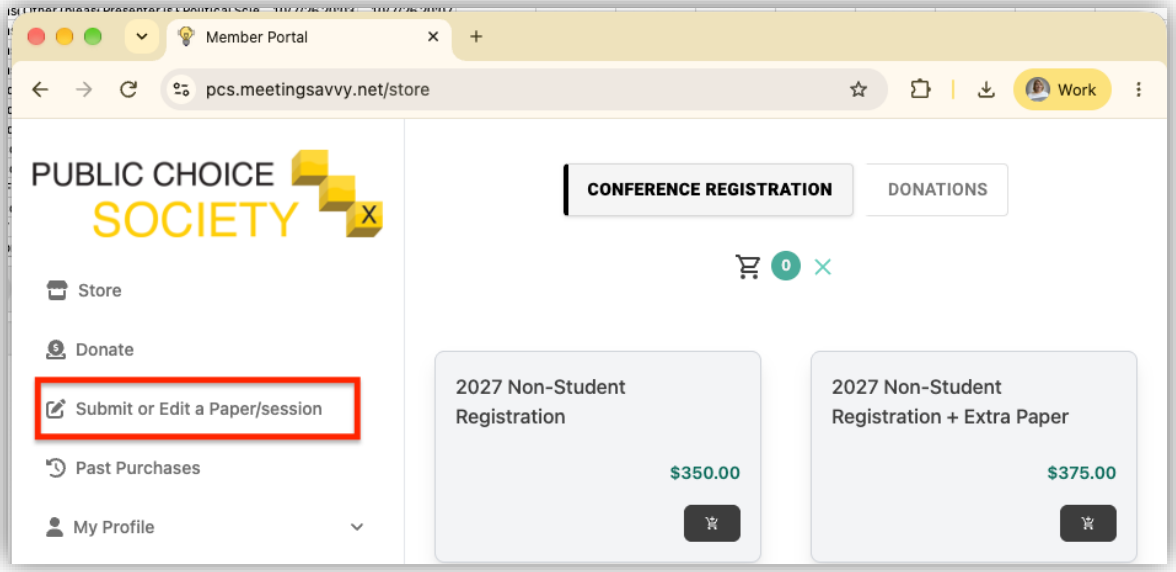
Getting Started with the PCS Member Portal and Submission System

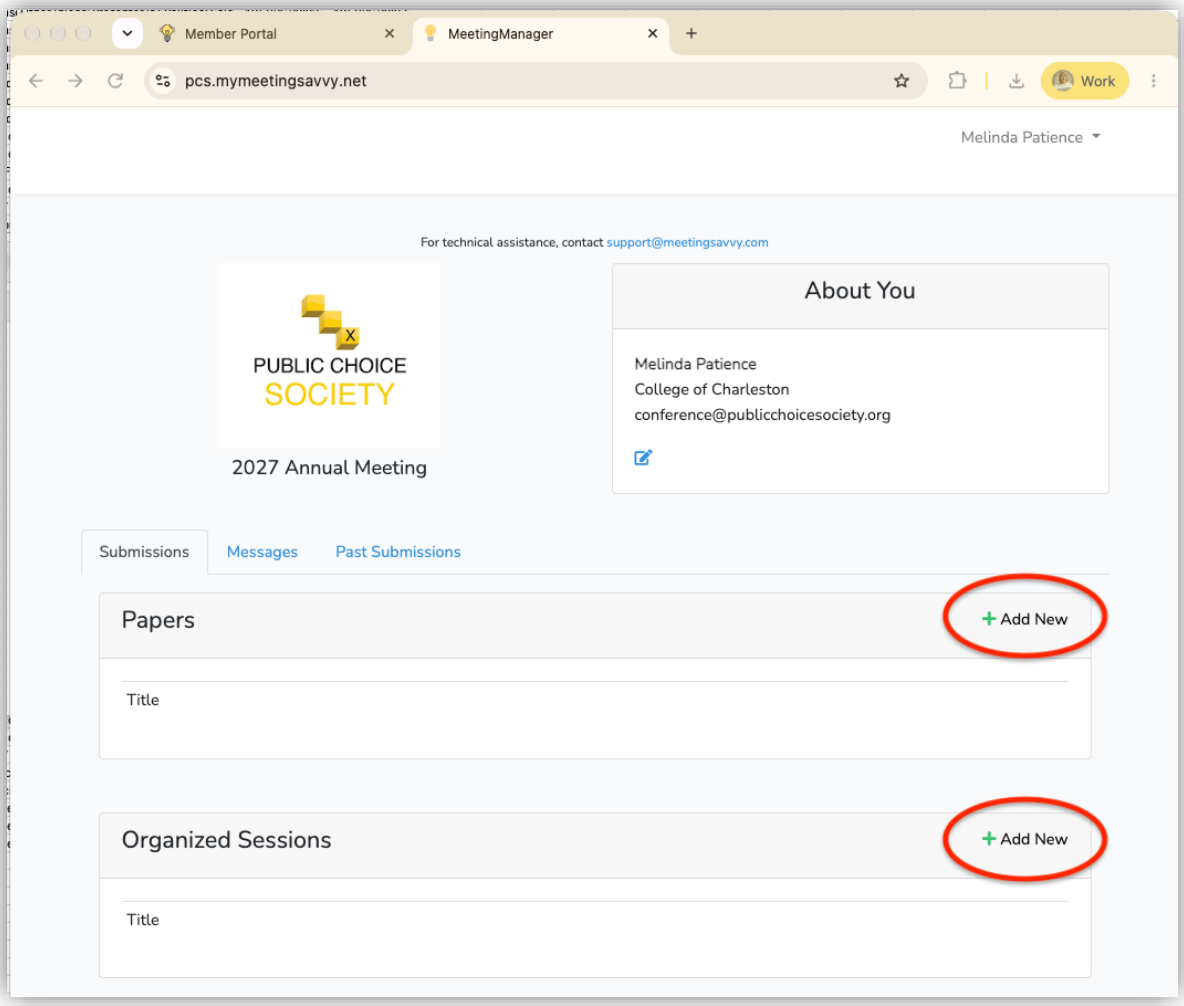
Visit https://pcs.meetingsavvy.net/login

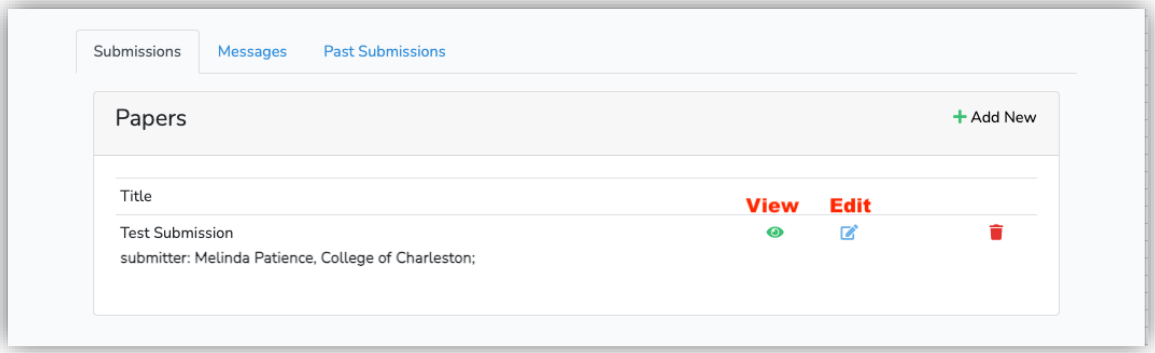


- Log in with your PCS member credentials.
  - If you have forgotten your password, click "Forgot your password?"
  - If you have never created a PCS account, please click "Create a new account."
  - If you have previously logged in with different email (student, past institution, etc), please do NOT create a new account. Log in with the old email and then update your information. If you do not know your password and no longer have access to the old email account, please contact conference@publicchoicesociety.org for assistance.
- Once you are in the portal, look for "Submit or Edit a Paper/session" in the left menu.



- Once in the submission system, you will have the opportunity to submit a paper proposal or an organized session proposal by clicking “Add New” next to the appropriate submission type.





- Please be sure to complete all submission fields as completely as possible.
    - This is particularly important for the “Is the presenter a student or professional” field as this is used to identify potential applicants for our Student Fellows program and the Ostrom Prize.
- You may view and edit your submissions at any time from the submission screen. Click on the eye to view or the pencil to edit.
